**December, 2015 Newsletter**

## **Holidays and new semester**

I am keeping my regular fall schedule through the 3<sup>rd</sup> week of December (Sun 12/20). I'll be closed from Mon 12/21 – Sun 1/03. The new spring schedule begins in the first week of January (Mon 1/04). Some of you reserved regular weekly lessons through the fall semester, ending in December. Be sure to reserve your spring dates too. Remember the \$5 / hr monthly discount for prepaying a minimum of three dates, and the \$10 / hr semester discount for prepaying a minimum of 12 dates!

## **MCAT Spring Study Group**

I would like to schedule the MCAT study group for two-hour blocks starting in January. A couple of you have expressed interest, and Eva will be contacting you to organize your preferences. You'll have a choice of day (Mon, Tue, Sat, or Sun) and format. The first option is a free two-hour session of bio / psych only. The second option is one hour of the free material and one hour of billed lessons in the physics and verbal sections. Group discounts would apply.

## **House call discount**

Effective spring semester, I will be slightly adjusting the house call pricing structure. One hour lessons will continue to be the same price, but the second hour will now be billed at the lower office rate. What this amounts to for pre-paid lessons is \$90 for one hour or \$150 for two hours.

## **GRE Class Price Increase**

If you are taking the January GRE class, remember to pay by the enrollment deadline of January 3. On January 4, the price is increasing! Next year's classes will require a one-time payment of \$500 or two payments of \$270. This slight increase reflects an increasing amount of handout material.

## **Free video lessons**

Spring semester is slower than the fall, so I'll have some time on my hands to record video lectures for my YouTube channel. I record 5 – 15 minute lessons. I will take up to one free request per week, so if you can think of a topic that you'd like to see worked out, let me know. I won't be able to work out all specific test-prep problems because of copyright concerns, but you can request topical overview or maybe particular problems that you saw in class.

### **Gift-ed students**

Congratulations are in order for Chris Caso, who has been working with me on a notorious chemistry class at LA Trade Tech. He scored at the top of his class on the last exam, scoring 88% with a class average in the 60s!

Alex Dalton, who has been working hard on the GRE, has brought up her scores by 8 – 10 points on each section. Amazing!
