

GRE-2 Homework: Verbal

Instructions

Practice these problems without worrying about time.

Check your answers. If you get a problem wrong,

1. Look up any words you didn't know and try again. Use new vocabulary words in sentences in everyday life.
2. If the book provides a solution, read it and make sure you understand why the right answer is right and why your answer was not the best choice.
3. If it is still not entirely clear to you, bring your questions to class for discussion next week. Have three questions ready in case someone else asks yours.
